Profile

Software engineer with strong architecture and algorithmic competences, seeking a role in an innovative or a research project. I'd like to bring my skills and motivation inside a team that drives people to explore new environments and technologies.

Work Experience

- June 2018 - Jan. 2019** **Engineer, French School at Athens**
Development of a Web GIS based on GeoServer
Frontend written in JS (ES2015) using VueJS, OpenLayers, and CesiumJS
Backend & GeoServer REST client in PHP using Guzzle / JMS Serializer System / Networks administration with ProxMox & PFSense
- Feb. 2015 - April 2018** **Software Engineer, Therenva**
Heavy C++ & Qt engineering on EndoSize (100k+ LoC)
Development of a backend website using Zend Framework 2.
Development of an hybrid mobile application, using Cordova.
Tooling with CMake, Git & Jenkins.
- March - Sept. 2014** **Software Engineer, Capptain**
Real-time processing on thousands of messages / second using Trident.
Message broking using Kafka.
Development of frontend widgets using GWT to monitor the system.
- June - Sept. 2013** **Web Developer, CartelMatic**
R&D on a Javascript interactive media player for visitors.
Use of JQuery and Bootstrap to design a complete frontend.
Development of a backend using PHP and MySQL.
- April - June 2011** **Web Developer, Miwim (RetailMeNot)**
